Jafra for Relief and Youth Development

Just like other areas throughout the country, Palestinian refugee camps in Lebanon have been under health quarantine procedures due to COVID19 contamination. All of our centers have stopped receiving the beneficiaries, however, our facilitators keep communicating with the children in particular. Jafra has developed various activities, secured needed materials and paid visits to the children at home. Our purpose is to create together plenty of educational and recreational ideas that may help in utilizing time properly.

To ensure children have times of entertainment and interest, Jafra facilitators in Qudsaya have distributed materials of painting and handwork to children to be used during their home staying.

In South Damascus, Jafra's psychosocial support team has taken the initiative to create social media groups aiming to resume activities with children. The activities are explained by the facilitators in a simple and interesting way to support the children during their home stay.

Throughout a year, Jafra has been trying a new method in the organic farming in the Palestinian camps aiming at encouraging the refugees to expand the green spaces using rooftops.

In April, the Foundation succeeded in producing the compost using local food waste according to a scientific plan with the available means and resources.

The result is pretty satisfactory and proved by laboratory tests.

Jafra in Homs participate in Blood Donation Drive

4

Under GAPAR's patronage in Homs camp, Jafra Foundation participates with the local community organizations in the blood donation drive "Your Blood is Giving". The drive aimed at supporting hospitals and medical centres to meet the patients in need.

Jafra Foundation launched a voluntary disinfection campaign to tackle COVID19 virus in the refugee camps in Syria and Lebanon.

The disinfection covered South Damascus, Jaramana, Homs, Qudsaya and Al- Husseinyeh camps in Syrian, and Ein El-Hilwa, Burj El-Barajneh and Shatila camps in Lebanon.

The campaign was carried out in cooperation with the local civil organizations in the camps.

Our goal is to create a safe and healthy environment for the population.

Masks Distribution For Free In Camps

6

Getting a mask for health protection nowadays is just a quite simple right that every one should have. However, the hard living conditions and the high prices have been depriving many of people from access to masks. Jafra is working to utilize the time and available abilities to make triple-layer masks to be distributed for free. Our team in Qudsaya could produce and distribute over 3000 masks in the refugee camps in Syria.
