Jafra for Relief and Youth Development

The Jafra Foundation is launching a new fundraising campaign through Global Giving to help its education centers in Syria. The donations will serve 1200 students to stay at school and receive quality education through experimented teachers. The funds will also pay for stationary. Your support is much needed! Meet us on the GlobalGiving platform.

The Ein el Hilweh Food Production Workshop has reopened and is welcoming new participants. They are eager to learn all the fundamental guidelines for a safe job in commonly run kitchens, as well as all the methods for preparing, bottling, and preserving food without the use of artificial preservatives.

The Jafra Lebanon & Syria facilities actively participated in the global campaign to encourage women to do early breast cancer detection. Activities and sessions were held to increase awareness of the value of getting regular physicals or self-checkups. Breast cancer has every potential of being treated and cured if found early enough.

Participants in Jafra's Rooftop prepare their roofs for the winter after the sweltering summer. They are guided through the process with the assistance of Jafra's agronomist and given fresh advice on how to continue planting and harvesting as the next cold season approaches.

Jafra Homs is taking part in a campaign to raise awareness about the harms of smoking together with local partners. Volunteers talk to kids and teenagers to educate them about the risks of smoking, especially if they start when they're young. For smokers, it's unnecessary to mention that quitting permanently is the best option.
