Jafra for Relief and Youth Development

At Jafra, we believe that practicing a sport is one of the way to keep the diseases away. Football teams exist and persist in all our locations, with great successes for many. The young players can be proud to be committed and persevere in the learning of the sport they like.

Jafra Centers are welcoming children from all ages to allow them having access to activities of many kinds. Children without discrimination have the right to play and have recreational activities, express their feelings, ask questions and be listened. The Jafra Child Protection program is continually updated to adhere to the strict international standards.

Having basic computer literacy is vital to success in today's world. Typing, communicate through e-mails, using data bases, do online researches... can be demanded when applying to many types of jobs.

Jafra develops computer courses in its Centers to allow participants become computer-literate without the burden of having to pay high fees.

One of Jafra's priority is to support communities keeping or rebuild their livelihoods. Since 3 years, the rooftop planting initiative "From Grey to Green" is active and widening. Several camps are involved and the participants are measuring the positive impact a garden have on them, their families and the community around. The project takes a new step with the installation of greenhouses in 2023.

Following its aim to support the neediest individuals find back livelihoods, Jafra keeps teaching the basics of producing food in a collective kitchen. At the same time, Jafra is keen to transmit good practices to the participants by giving them the taste to prepare and consume seasonal type of vegetables and fruits.
