Needs Assessment

(Burj El-Barajneh camp)

2023

This survey summarizes the basic needs of the population in the Jafra Foundation's areas of work in Lebanon, to the intervention required to target the various groups of community to bridge the gap in the lack of basic services, trainings or projects needed by the residents of the organization's areas of work:

- Identifying the demographic structure of the Foundation's areas of work in general (the population, the number of: IDPs, children, males, females, persons with disabilities, the unemployment rate for males, and the unemployment rate for females).
- Identifying the services in the Foundation's areas of work.
- Identifying the basic needs of food or non-food items in the Foundation's areas of work.
- Identifying the key sectors in the markets of the Foundation's areas of work and the challenges facing the population in accessing this market and the challenges faced by these sectors that prevent expansion and growth.
- Identify the conditions of education and the basic educational needs in the Foundation's areas of work.
- Identify the key professions in the Foundation's areas of work and what professions exist/non-exist and identify the possibility of coordination and cooperation with the owners of these professions.
- Studying the conditions of households and their income sources of in the Foundation's areas of work to identify the most basic needs of these families.
- A detailed study of the conditions of youth in the Foundation's areas of work to determine the most important vocational or developmental training needed, whether to help them in their studies, or to empower them economically to enable them to access the labor market.
