Jafra for Relief and Youth Development

Palestine is and will remain the land of all the Palestinian people. At Jafra, historical facts, symbols, geography of Palestine is now part of a program transmitted to the children and youth in all Jafra centers. Palestine will not be forgotten and the Palestinians will always stay the legitimate owners of the land.

Jafra is keen to provide educational programs not only to children and youth but also to interested adults. The most demanded course is the English language one and a big number of participants are attending the sessions.

Free time out of school is often the occasion to open to different topics, so summer was the right time for Jafra to organize new things, away from the classical school programs. In Qudsaya for example, fashion design is on the menu. Participants are showing dedication and creativity to produce nice and doable fashion styles.

Summer can be very critical if waste is not removed timely from the streets as temperature can reach up to 40 degrees daily in the Middle-East. Jafra waste removal teams allow the inhabitants to avoid the risks of living among rotting garbage in the camps and gatherings' streets.

Jafra believes in equipping every individual with various life skills. First Aid gestures are part of them and important to master especially for young sport practitioners. Thanks to partnerships with the Civil Defense, young sport players can benefit from these important life skills for themselves and to help comrades.
