## June 2024

---

Jafra for Relief and Youth Development

In partnership with Welthungerhilfe and funding from BMZ, Jafra has launched the project “Empowering Women and strengthening the resilience of vulnerable rural and urban communities in South Lebanon and Beirut”. The project targets beneficiary groups of the Ein al-Hilweh, Burj el-Barajneh, Shatila, and Burj Shemali camps, and includes cash-for-work activity for women within the food industry and rooftop farming activity.

With the start of the Summer Club at Jafra Centers in Syria, children enjoy attending various interactive and motor activities, ensuring a summer vacation full of learning and fun. They acquire new skills and diverse knowledge, and develop their creative abilities. Moreover, they learn about the culture of recycling and making things that can be useful, which contributes to enhancing their environmental awareness. The activities are facilitated by a specialized, competent and experienced staff to ensure the maximum benefit for children.

Despite the hot weather, the services team at the Jafra Center in southern Damascus continues its work with dedication to cleaning the streets and alleys in the area. The team is always focused on cleaning the vicinity of schools and popular markets in the area to maintain a clean and disease-free environment. All thanks to the team that works summer and winter to serve the people.

Every year, Jafra Foundation commemorates World Refugee Day through activities that highlight the conditions of Palestinian refugees. 6.4 million Palestinian refugees are distributed around the world, deprived of returning to their cities and villages from which they were forcefully uprooted more than 70 years ago, despite International Resolution No. 194, which stipulates the right of the Palestinian refugee to return to their homeland.

By the Eid al-Adha, over a million children in Gaza are deprived of the joy of Eid due to the genocide war waged by the occupation on the Strip. The children of Gaza live in extremely harsh conditions under bombardment, displacement, hunger, fear and disease. Children in Jafra have expressed their solidarity with the children of Gaza through various activities held by the organization's centers spread across Syria and Lebanon.
